Summary

AI-Assisted Developer | IT Management Student (UADE).
Tech enthusiast utilizing **AI Agents** (Claude Code/OpenCode) to assist in coding **Python scripts** and learning Web Scraping workflows.
I leverage Large Language Models to bridge the gap between my current coding knowledge and complex project requirements, ensuring functional and validated outputs.
Eager to apply my 'Human-in-the-loop' approach to help train and refine AI models at Mindrift.

Education

In Progress Universidad Argentina de la Empresa (UADE) , BSc in Information Technology Management	Buenos Aires, Argentina
• Current GPA: 7.6 Focus: Systems & Business Processes.	Mar 2024 – Present
Graduated Colegio Eccleston , High School Diploma in Economics & Administration	Buenos Aires, Argentina
• Final GPA: 9.3	Mar 2018 – Dec 2023

Experience

Freelance / Personal Projects , Junior Developer (AI-Assisted)	Remote
• Vibe Coding : I use LLMs (Claude 3.5 Sonnet) to generate, debug, and understand Python code for personal automation projects.	Jan 2024 – Present
• Built functional Data Extraction scripts by iterating with AI tools, learning how to handle JSON structures and APIs in the process.	
• Applied manual quality assurance (QA) to verify that AI-generated code produces correct and reliable data.	
Grido , Operations & Administrative Analyst	Buenos Aires, Argentina
• Responsible for daily operational data entry and validation (Cash Flow & Inventory).	Jan 2024 – Present
• Managed administrative tasks with high attention to detail.	
• Problem-solving in a high-demand retail environment.	

Projects

Polymarket Data Tracker (Python Project)	2025
Learning project: API consumption and data tracking.	
• Built a Python bot to track market probabilities using the Polymarket API, with code generated and refined via AI Agents .	
• Used LLMs to help analyze news sentiment, learning how to integrate different APIs (Telegram/OpenAI) in one workflow.	
• Gained hands-on experience with environment variables (.env) and basic security practices.	
Blockchain Interaction Script (Base Network)	2025
Web3 exploration project.	
• Used Web3.py to interact with a smart contract on the Base Network, learning the basics of blockchain transactions.	
• Deployed a basic immutable registry to understand decentralized application architecture.	
Web Deployment Portfolio	2025
Full stack deployment practice.	
• Deployed a personal portfolio using Vercel , connecting it to a Supabase database.	
• Learned CI/CD concepts by setting up automatic deployments from GitHub.	

Certifications

Red Hat System Administration I (RH124)	2025
• View Official Credential (Credly) 🔗	
- Fundamental Linux Skills.	
Claude Code in Action	2026
• View Official Credential 🔗	
- Course on AI coding assistance.	

Skills

AI & Learning Tools: Claude Code, ChatGPT, Perplexity (Used for coding assistance and debugging)
Development (Junior): Python (Basic Scripting/API Requests), HTML/CSS (Basic), SQL (Learning)
Core Tech: Linux (RHEL Fundamentals), Git (Basic usage), Bash Terminal
Languages: Spanish (Native), English (B2 - Technical Reading/Writing)
